PROFESSIONAL SUMMARY

I'm a Junior Web Developer who values simplicity, clarity, and balance—both in code and in life. I stay calm under pressure, focusing on solutions and planning over panic.

I'm skilled in building responsive, user-friendly websites with HTML, CSS, JavaScript, and React. I communicate clearly, collaborate well, and successfully led a bootcamp project delivered on time. With multilingual skills and a flexible mindset, I can bring a global perspective to the projects.

SKILLS

HARDSKILLS :

HTML, CSS, JavaScript, React
Git & GitHub, Node.js
Visual Studio Code, Figma
Responsive Web Design

SOFT SKILLS :

Teamwork
Communication
Problem-solving
Time Management

PROJECTS

QRMenu / Friend's First:

Role: Frontend Developer – Multilingual Menu, Cart & Admin Panel

- Developed a multilingual restaurant menu system with TR/EN/FR support
- Implemented category filtering, product details, and an interactive cart system
- Built an admin panel enabling CRUD operations for menu items
- Integrated REST APIs (MockAPI) with Redux Toolkit for state management
- Delivered a fully responsive UI using reusable components and clean architecture

BarBerBook –Appointment Booking System :

Role: Full Stack Developer – Auth, Roles & Appointment Flow

- Built a full-stack appointment platform using React, Node.js, Express, and MongoDBUsed HTML and CSS to create a clean, responsive, and smooth-scrolling interface
- Implemented login, registration, JWT authentication, and role-based access control
- Developed appointment scheduling and protected route logic
- Designed responsive UI and created clean, modular components
- Deployed backend and frontend, ensuring smooth end-to-end workflow
